SIEMENS

Operating Instructions

RDE100.1DHW

RDE100.1DHW is a room thermostat that allows you to set the ideal room temperature at the time you want. In addition, it offers independent control of DHW. There are several switching patterns available that can be set to your specific needs.

Do you want to adjust the time and day?

You can set the current time of day.

set	Proceed as follows:	
ok	Press set and select ①	
+	Press ok and the time flashes for setting	
_	•	Press + or - to adjust the time
mode	•	Press ok to confirm
	•	The weekday flashes, press + or - to select the desired day
	Press ok to save the value	
	Press mode to exit or wait for the program to exit automatically	

Do you want to lock the buttons?

- · , · · ·		
mode	Press and hold mode for at least 7 seconds to activate a button lock. Repeat to unlock.	
	The unit operates normally when the buttons are locked, but no changes are possible while the buttons are locked.	

Are your rooms too warm/too cold?

ok set

mode

Press + or - to increase or decrease the room temperature setpoint in increments of 0.5 °C / 1 °F. Proceed as follows:

- Press + or to adjust the setpoint temporarily. This adjustment is reset as soon as the operating mode changes.
- Press ok, set or mode to save the value or wait for the program to exit automatically
- To lock the setpoints, use parameters P06 and

Do you want to change the operating mode?

mode

The thermostat provides Comfort mode, Economy mode, and Auto mode. Changeover between the operating modes can be made manually by pressing mode.

Comfort mode is the permanent (24 h) selection of Comfort. Select this mode to maintain Comfort temperature permanently without any time switch. It is used during occupancy periods, for example.

(Economy mode is the permanent (24 h) selection of Economy. Select this mode to maintain the Economy temperature permanently without any time switch.

It is used during non-occupancy periods, for example at night.

OAUTO In Auto timer mode, operating modes (Comfort, Economy) are changed automatically according to the time switch set.

Note:

Frost protection is a function always active in the background. As soon the room temperature falls below 5 °C, the unit automatically activates the heating ∭

Do you want to set permanent temperature setpoints?

set ok

Press set and select

- Press ok to confirm
- Press mode to select an operating mode, Comfort or Economy
- mode
- Press + or to adjust the setpoint permanently.
 - Press ok to confirm
 - Press mode to exit or wait for the program to exit automatically

Note: This permanent setpoint is used during Auto timer mode.

Energy saving tips without loss of comfort

- Select Auto timer mode during the heating period, and set the time switch according to your normal habits at home
- Select Economy mode or Holiday mode for long periods of non-occupancy and during summer period

Do you want to set your Holiday mode?

set ok

mode

Use the Holiday mode to set the thermostat to a constant temperature while absent.

- Press **set** and select
- Press ok to confirm
- Press + or to adjust the temperature setpoint
- Press ok to confirm
- Press + or to adjust the number of days for holidays (Note: 0 = Holiday mode OFF)
- Press ok to save the value
- When Holiday mode is activated, the remaining days are displayed on the screen

Note: If you press mode while Holiday mode is active, the function is turned off and the [1] symbol disappears.

If the Comfort and Economy setpoint values are both locked, the lowest locked setpoint value is the Holiday mode setpoint value. You can adjust the setpoint temperature from 5 °C up to the lowest locked setpoint value.

Do you want to enter your own time switch?

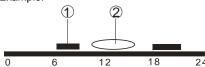

Option 1: Time switch with individual day selection (P11=0)

set ok +

You can select Comfort or Economy at 15 minute intervals throughout the day. The 0:00 to 24:00 hour time bar allows you to set the operating mode for the selected day(s).

Example:

mode

- ① Visible bars: Control to Comfort temperature
- ② Invisible bars: Control to Economy temperature

When Auto timer mode is enabled, changeover between the operating modes is automatic after the settings are saved.

Proceed as follows:

- 1) Press **set** and select \bigcup_{AIITO} .
- 2) Press ok to confirm.
- 3) Time switch for day Mon(1) is displayed.
- 4) Press + or to select the day, from Mon(1) to Sun(7).
- 5) Press ok to confirm the selection and initiate time programming.

During programming step:

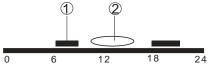

- 6) Press mode to select an operating mode, (Comfort or Economy) or
- 7) Press + or to adjust the time setpoint by 15 minutes for the selected mode.
- 8) Press ok to save the time switch.
- 9) Repeat steps 4-8 for all remaining days (if required);
- 10) Press mode or wait for the program to exit automatically

Option 2: Time switch with the same 7 day selection (P11=1)

set
ok
+
mode

You can set all the 7 day time switches at the same time

Example:

- ① Visible bars: Control to Comfort temperature
- ② Invisible bars: Control to Economy temperature

Proceed as follows:

- 1) Set the parameter (P11=1). Please refer to the section "Do you want to change parameters".
- 2) Press **set** and select \bigcirc
- 3) Press ok to confirm.
- 4) Time switch for period Mon (1) Sun (7) is displayed.
- 5) Press ok to initiate time programming.

During programming step:

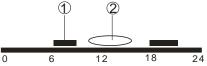

- 6) Press **mode** to select an operating mode, (Comfort or Economy) **or**
- 7) Press + or to adjust time setpoint by 15 minutes for the selected mode.
- 8) Press ok to save the time switch.
- Press mode or wait for the program to exit automatically.

Option 3: Time switch with 5-2 day selection (P11=2)

set
ok
+
mode

You can set Monday - Friday time switch at once and Saturday - Sunday time switch at once.

- ① Visible bars: Control to Comfort temperature
- ② Invisible bars: Control to Economy temperature

Proceed as follows:

- 1) Set the parameter (P11=2). Please refer to the section "**Do you want to change parameters**".
- 2) Press **set** and select $\frac{()}{AUTO}$.
- 3) Press ok to confirm.
- 4) Time switch for period Mon(1) Fri(5) is displayed.
- 5) Press + or to select the period, Mon (1) Fri(5) or Sat (6) Sun (7).
- 6) Press **ok** to confirm the selected period and initiate time programming.

During programming step:

- 7) Press **mode** to select an operating mode, (Comfort or Economy) **or**
- 8) Press + or to adjust the time setpoint by 15 minutes for the selected mode.

Do you want to change the parameters?

+	If you want to change control parameters, proceed as follows:	
ok mode	 Press + and - simultaneously for 5 seconds Release them and parameter "P01" is displayed on the bottom segment 	
	 Press + or - to scroll to the parameter that needs to be adjusted Press ok to select this parameter 	
	Press • r - to adjust the value Press • k to confirm the adjusted value	
	Press mode to exit the parameters without saving or wait for the program to exit automatically	

Parameter list

_	T =	T 2 / / / / / / / / / / / / / / / / /
Parameter no.	Description	Setting range (default)
P01	Time format	1 = 24:00 hours (default)
		2 = 12:00 AM/PM
P02	Selection of °C or °F	1 = °C (default)
		2 = °F
P03	Standard	1 = room temperature (default)
	temperature display	2 = setpoint
P04	Temperature sensor	-33 °C
	calibration	Step 0.5 °C
		(-66 °F, step 1 °F)
		Default: 0 °C
P06	Comfort setpoint lock	0 = OFF (default)
		1 = ON → locked according to
		setting in permanent temperature setpoint
P08	Economy setpoint	0 = OFF (default)
1 00	lock	1 = ON → locked according to
		setting in permanent
		temperature setpoint
P09	Buzzer	0 = OFF
		1 = ON (default)
P10	Show frost protection	0 = OFF (default)
	icon	1 = ON
P11	Time switch type for autotimer and DHW	0 = individual Days (default)
	autotimer and DHVV	1= all 7 days
D.10	5	2= 5/2 days
P12	Periodic pump run	0 = OFF (default)
D10	DI DA C	1 = ON
P13	DHW timer bar timeout	0 = no DHW bar 1 = 1 minute (default)
		2 = 2 minutes
		Adjustable range 0 to 15
		minutes
P21	Button scanning rate	0.2 = 0.25 s
	for the capacitive	0.5 = 0.5 s
	buttons	1.0 = 1.0 s (default)
	Note: a higher scanning rate means	1.5 = 1.5 s
	shorter battery life.	
P22	Reload factory	0 = OFF (default)
	settings	1 = reload
P23	Software version	No adjustment possible
	information	
P78	Control behavior	0 = On/Off, 1.0K
		1 = On/Off, 0.3K 2 = TPI fast
		3 = TPI medium
		4 = TPI slow (default)
P89	Forward shift on max	0, 0.5,24 h Default: 0 h
P90	Early shutdown max	0, 0.5,6 h
		Default: 0 h
