**RDE100.1RF** 

The RDE100.1RF consists of a wireless room thermostat RDE100.1RF which operates in connection with an RDE-MZ6 receiver. These units allow you to set the ideal room temperature at the time you want. There are several switching patterns available that can be set to meet your individual needs.

#### Do you want to set the time of day and the weekday?

Set	Proceed as follows:	
Ok	Press <b>Set</b> and select ①	
+	Press <b>Ok</b> and the time of day flashes for setting	
_	Press + or - to adjust the time of day	
Mode	Press <b>Ok</b> to confirm	
	The weekday flashes; press + or - to select the desired day	
	Press <b>Ok</b> to save the setting	
	Press <b>Mode</b> to exit or wait for the program to exit automatically	

#### Are your rooms too warm/too cold?

Press + or - to increase or decrease the room temperature setpoint in increments of 0.5 °C/1 °F. Proceed as follows: Ok Press + or - to change the setpoint Set temporarily. This readjustment is reset as soon as Mode the operating mode changes Press Ok, Set or Mode to save the setting or wait for the program to exit automatically To lock the setpoints, use parameters P06 and P08

#### Do you want to change the operating mode?

The thermostat provides Comfort, Economy and automatic mode. Changeover between the operating modes can be made manually by pressing Mode.

Comfort mode is the permanent (24 h) selection of Comfort. Select this operating mode to maintain Comfort temperature permanently without any time switch. It is used during occupancy periods, for example.

C Economy mode is the permanent (24 h) selection of Economy. Select this operating mode to maintain the Economy temperature permanently without any time switch. It is used during non-occupancy periods (e.g. at night).

Auto Timer mode, the operating modes (Comfort, Economy) are changed automatically according to the time switch setting.

#### Note:

Frost protection is a function always active in the background. As soon as the room temperature falls below 5 °C, the unit automatically activates heating ......

### Do you want to set permanent temperature setpoints?

#### Set Ok

- Press **Set** and select
- Press Ok to confirm
- Press Mode to select the operating mode (Comfort or Economy)
- Press + or to adjust the setpoint Mode permanently
  - Press Ok to confirm
  - Press Mode to exit or wait for a timeout to exit automatically

This permanent setpoint is used during Auto Timer mode.

### Energy saving tips without loss of comfort

- Select Auto Timer mode for the heating period, and set the time switch according to your normal habits at home
- Select Economy or Holiday mode for longer periods of non-occupancy and the summer period

#### Do you want to set your Holiday mode?

# Set Ok

Mode

Use the Holiday mode to set the thermostat to a constant room temperature while absent.

- Press **Set** and select
- Press Ok to confirm
- Press + or to adjust the temperature setpoint
- Press Ok to confirm
- Press + or to set the number of days for holidays (0 = Holiday mode Off)
- Press Ok to save the setting
- When Holiday mode is activated, the remaining days are displayed

If you press Mode while Holiday mode is active, the function is deactivated and symbol [] disappears. If the Comfort and Economy setpoints are both locked, the lowest locked setpoint is the Holiday mode setpoint. You can adjust the setpoint from 5 °C up to the lowest locked setpoint.

#### Do you want to enter your own time switch?

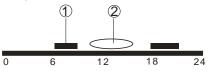

### Option 1: Time switch with individual day settings (P11=0)

Set Ok

Mode

You can select Comfort or Economy mode in steps of 15 minutes throughout the day. The 0:00 to 24:00 hour time bar allows you to set the operating mode for the selected day(s).

#### Example:

- ① Visible bars: Control to Comfort temperature
- ② Invisible bars: Control to Economy temperature

When Auto Timer mode is enabled, changeover between the operating modes is automatic after the settings are saved.

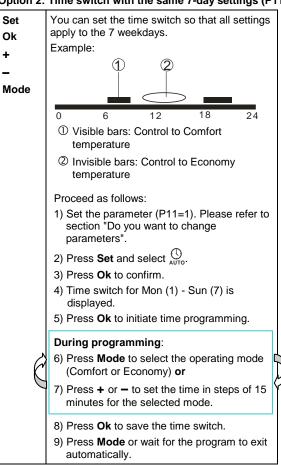

Proceed as follows:

- 1) Press **Set** and select  $\frac{(1)}{AUTO}$ .
- 2) Press Ok to confirm.
- 3) Time switch for Mon (1) is displayed.
- 4) Press + or to select the weekday, from Mon(1) to Sun(7).
- 5) Press Ok to confirm the selection and initiate time programming.

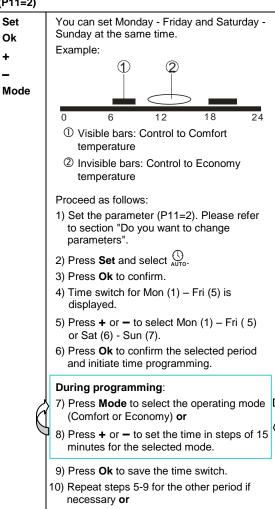

#### **During programming:**

- 6) Press **Mode** to select the operating mode (Comfort or Economy) or
- 7) Press + or to set the time in steps of 15 minutes for the selected mode.
- Press Ok to save the time switch.
- 9) Repeat steps 4-8 for all remaining days (if required) or
- 10) Press Mode or wait for the program to exit automatically.

#### Option 2: Time switch with the same 7-day settings (P11=1)

# Option 3: Time switch with 5-2-day settings (P11=2)

#### Factory default of 7-day time switch

automatically.

Default	Day/s	Comfort mode	Economy mode
	Mo (1) – Fr (5)	6:00 – 8:00 hr 17:00 – 22:00 hr	22:00 – 6:00 hr 8:00 – 17:00 hr
	Sa (6) – Su (7)	7:00 – 22:00 hr	22:00 – 7:00 hr

11) Press Mode or wait for the program to exit

#### Does symbol appear on the display?

Symbol is displayed when the batteries are low. Replace them with 2 new alkaline batteries type AAA. Proceed as follows:

- Get 2 new alkaline batteries type AAA
- Remove the battery holder and then the batteries.
   Insert the new batteries and, within 1.5 minutes, replace the battery holder
- Ensure the exhausted batteries are disposed of correctly, in compliance with environmental requirements

	<ul> <li>Press Mode to exit the parameters without saving or wait for the program to exit automatically</li> </ul>

### Parameter list

Parameter no.	Description	Setting range (default)
P01	Time format	1 = 24:00 hours (default)
P02	Selection of °C	2 = 12:00 am/pm 1 = °C (default)
DOO	or °F	2 = °F 1 = room temperature
P03	Standard temperature display	(default)
P04	Temperature	2 = setpoint -33 °C
	sensor calibration	Step 0.5 °C
		(-66 °F, step 1 °F) Default: 0 °C
P06	Comfort setpoint	0 = OFF (default)
	lock	1 = ON → locked according to setting in
		permanent temperature
P08	Economy setpoint	setpoint 0 = OFF (default)
	lock	1 = ON → locked
		according to setting in permanent temperature
		setpoint
P09	Buzzer	0 = OFF 1 = ON (default)
P10	Show frost	0 = OFF (default)
D44	protection icon	1 = ON
P11	Time switch type for Auto Timer	0 = individual days (default)
		1= all 7 days
P12	Periodic pump run	2= 5-2 days 0 = OFF (default)
		1 = ON
P14	X1 external input	0 = no input (default) 1 = external sensor
		2 = digital input
P15	Temperature limitation	0 = OFF (default)
P16	Max. limitation	2560 °C, step 1 °C or
	temperature for floor heating	77140 °F, step 1 °F Default: 30 °C
P17	Window contact	0 = normally open contact
<b>&gt;</b>	features	(default) 1 = normally closed
		contact
P19	Sequential number of room unit	0 = no display of zone (RF off)
		1 = zone number 1 (for standard RF) (default)
P20	RF learn	6 = zone number 6 0 = OFF (default)
Dod		1 = ON
P21	Scanning rate for the capacitive	0.2 = 0.25 s 0.5 = 0.5 s
	buttons Note: Shorter	1.0 = 1.0 s (default)
	scanning rate	1.5 = 1.5 s
	means shorter battery life	
P22	Reload factory	0 = OFF (default)
P23	settings Software version	1 = reload  No adjustment possible
	information	, ,
P78	Control behavior	0 = On/Off, 1.0K 1 = On/Off, 0.3K
		2 = TPI fast
		3 = TPI medium 4 = TPI slow (default)
P89	Forward shift on max	0, 0.5,24 h
	İ	Default: 0 h
P90	Early shutdown max	0, 0.5,6 h
